

SLEEKSTER™

FRAME MOUNTED LIGHT BARS
By Randy Ellis Design Inc.

INSTALLATION INSTRUCTIONS Tips and Tricks

Tip 1: Open door on both sides of the vehicle and use a ratchet strap run all the way through the open doors of the vehicle to hold the slider in place. You still need to use jacks under the slider but the strap will aid in keeping the slider in place.

Tip 2: Use clamps like the one in the picture to hold the slider to the sheet metal before riveting. You will still need to use jacks under the slider to hold the weight.

You still need to use jacks or wood blocks under the sliders with both of these methods to hold the weight of the slider. These methods will aid you in getting the alignment right for install.
